

GL6509 FW Upgrade Guide

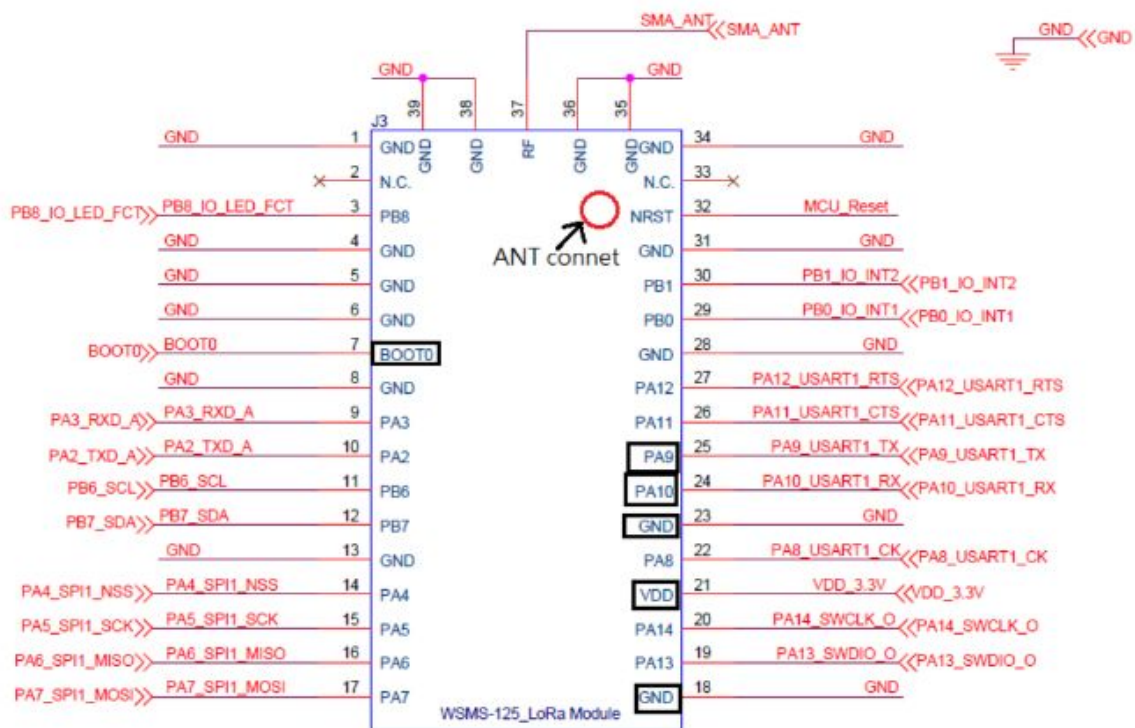

1. Software tool download

http://www.st.com/content/st_com/en/products/development-tools/software-development-tools/stm32-software-development-tools/stm32-programmers/flasher-stm32.html

or search key word “**STM32 Flash loader demonstrator** ” now is version 2.8 版

2. Hardware

2.1 Pin Define

2.2 Pin Connet

Boot0 connet to VDD

2.3 GL6509

2.4 G76S、G78S EVK

3. Upgrade Step

3.1 Power on module, MCU enter IAP mode.

3.2 Open Flash Loader Demonstrator 3.3 Select Com port

The image shows a screenshot of the 'Flash Loader Demonstrator' application window. The window has a title bar with the text 'Flash Loader Demonstrator' and standard Windows window controls (minimize, maximize, close). Below the title bar is a header area with the ST logo and the text 'life.augmented'. The main content area contains the instruction: 'Select the communication port and set settings, then click next to open connection.' Below this is a section titled 'Common for all families' which contains a radio button labeled 'UART' that is selected. Under the 'UART' section, there are four rows of settings, each with a label and a dropdown menu: 'Port Name' is set to 'COM9' (highlighted with a red rectangle), 'Baud Rate' is set to '115200', 'Data Bits' is set to '8', 'Parity' is set to 'Even', 'Echo' is set to 'Disabled', and 'Timeout(s)' is set to '10'. At the bottom of the window are four buttons: 'Back', 'Next', 'Cancel', and 'Close'.

Flash Loader Demonstrator

ST life.augmented

Select the communication port and set settings, then click next to open connection.

Common for all families

☒ UART

Port Name: COM9

Baud Rate: 115200

Data Bits: 8

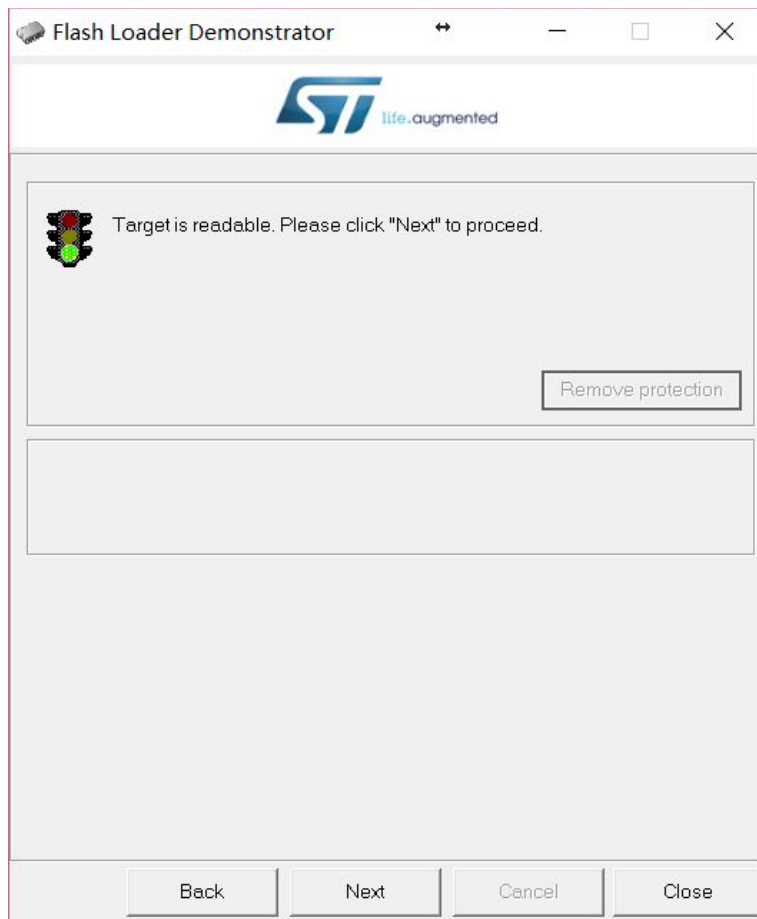

Parity: Even

Echo: Disabled

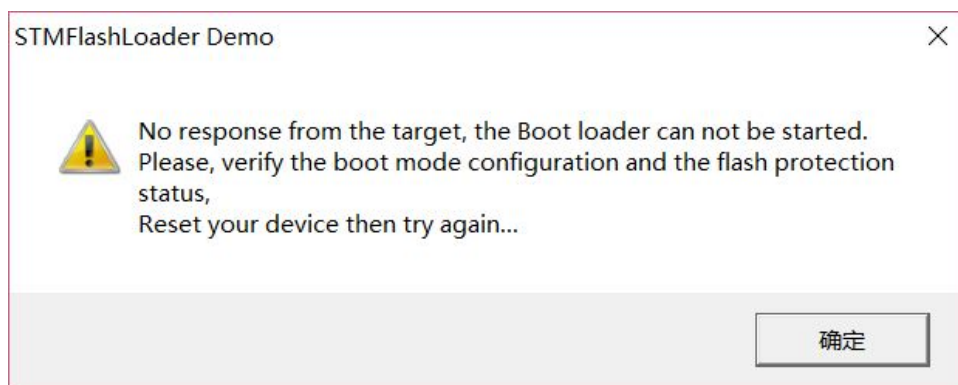

Timeout(s): 10

Back Next Cancel Close

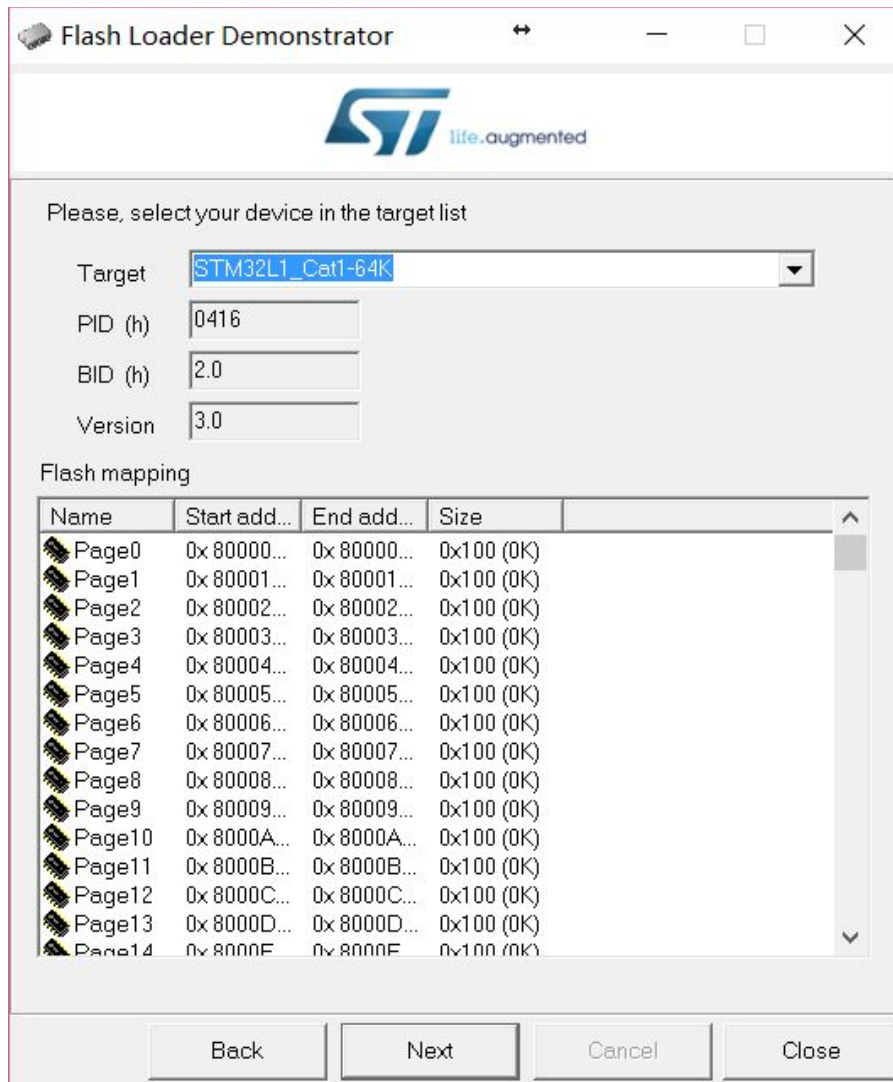

3.4 Press “Next” , check if MCU enter IAP mode. If it is ok, show below screen.

If it is fail, show below screen. Please reset module.

3.5 Select module size “STM32L1_Cat1-64k”

if G76S sip module

 Flash Loader Demonstrator

 life.augmented

Please, select your device in the target list

Target

STM32L0_x3_x2_x1_192K

PID (h)

0447

BID (h)

15.15

Version

3.1
